

PROBLEM STATEMENT

DATE	19-Nov-2022
TEAM ID	PNT2022TMID34698
PROJECT NAME	IOT Based Smart Crop Protection System for Agriculture

- Animals damaging crops remains as a problem when a better Smart Crop Protection Device is not built.
- The birds may enter into crops for finding insects and may damage them.
- Insects in the field may damage the crops.
- Therefore the role of Investing for building Electric Fence and Scarecrow can be avoided by using smart crop protection systems.
